

Breakthrough T1D™

Formerly JDRF

**JOIN US AT A
BREAKTHROUGH T1D
COMMUNITY SUMMIT!**

A free event for anyone impacted by type 1 diabetes (T1D). Connect with the T1D community, hear from experts, learn about the latest research breakthroughs, explore vendor exhibits, and more. Don't miss this opportunity to learn, network, and grow together!

KEYNOTE SPEAKER APRIL BLACKWELL

NASA pilot and aerospace engineer April Blackwell is redefining what's possible for those living with Type 1 Diabetes (T1D). Diagnosed at 11, she has logged over 250 hours in experimental aircraft, served as an ISS flight controller, and leads in lunar mission engineering. Passionate about inspiring others, April is on a mission to become the first person with T1D in space, proving that the sky is not the limit!
